

Versa TUBE™

Architecture

Concerts

Corporate Events

Retail

Nightclub

Restaurant & Bar

Themed Environments

Film & Television

Imagine neon and fluorescent tubes changing color, having moving color patterns, and glowing with dynamic visual effects. All this is now possible with Versa TUBE.

By using video signal for control, Versa TUBE makes it easy to create countless looks from vibrant patterns to organic flows. There's no limit to what can be displayed.

A special diffusing lens ensures smooth light output and durability. An integrated power supply makes it easy to place tubes in any layout to run coordinated effects throughout.
